

The Tweed Door

The sleekest and most discreet communal door in the SPS range, the Tweed's ultra-modern style is the preferred choice for new build developments and lower risk environments. Top to bottom glazing in 3 large panels provides the warmest welcome and maximises visibility.

Furthermore, individual detailing can be engraved on the top panel, such as the building name, a logo, or crest, to add a further touch of prestige to the premises.

Complemented by side-screens and fanlights in the same discreet styling, the Tweed door adds class to communal areas of all shapes and sizes.
